EXCLUSIVE FEATURE!

Without Traxxas portal axles, your tires would need to be over 1" taller to achieve the same axle-to-ground clearance as the TRX-4 Chassis.
THE POWER OF PORTALS!

EXCLUSIVE FEATURE!

Without Traxxas portal axles, your tires would need to be over 1” taller to achieve the same axle-to-ground clearance as the TRX-4 Chassis.
Battery & Charger NOT INCLUDED

TACTICAL UNIT

TRAXXAS
The TRX-4 Scale and Trail Crawler is equipped right out of the box with Traxxas’ game-changing portal axle set. Portal axles lift the truck at the wheels for huge center pumpkin ground clearance. In order to achieve the same clearance with straight axles (and not get stuck), your tires would have to be over an inch taller than the TRX-4’s.

Straddling boulders with ease, the TRX-4 chassis takes the path less traveled and simply leaves all the others behind.

### The Power of Portals!

Without Traxxas portal axles, your tires would need to be over 1” taller to achieve the same axle-to-ground clearance as the stock TRX-4 Chassis.

### Extreme Capability

- Steep approach angles front and rear allow the TRX-4 Scale and Trail Crawler to tackle big obstacles head on. The front motor design biases weight forward for superior climbing ability.
- Canyon Trail 1.9 Tires
  - The 1.9 Canyon Trail tires and tuned foam inserts are super-soft and grippy to deliver superior bite on rocky surfaces with convincing scale realism. A 12mm steel hex drives the wheels.

### Rigid Steel Frame

- A heavy-duty formed-steel ladder frame with molded cross members creates an extremely rigid backbone. The elimination of chassis flex allows for precise wheel placement when navigating technical terrain.

### Aluminum GTS Shocks

- All-new oil-filled coil-over GTS shocks deliver silky-smooth damping performance and feature threaded shock bodies, an O-ring cap seal, and dual X-ring shaft seals.

### Hi/Low Range Transmission

- When the going gets tough, use your transmitter to shift into low range for incredible 4-wheel drive pulling torque. Shift into high range for blasting down the trail.

### Scale Details

- Scale details include functional spare wheel and tire, an off-road jack, and spare fuel canisters. The rugged bumpers provide clearance and protection and are equipped with recovery D-rings. The front bumper is designed to be compatible with many popular off-road accessories.

### T-Lock Remote Locking Differentials

- Traxxas gives you the freedom and versatility to lock and unlock both of the patented front and rear T-Lock differentials remotely, all controlled from your transmitter.

### Traxxas Tough

- Leave the tools in the bag! The Traxxas TRX-4 chassis is built to handle the rigors of remote locations and all-day driving fun. The foundation begins with a pair of 1.5mm thick steel frame rails. Large diameter steel links and heavy-duty, extra-wide rod ends keep the suspension firmly mounted. Hardened steel u-joints are ultra reliable, while the brushless-ready steel portal axle and transfer case gears are smooth and quiet.

### 3s Power System

- The new XL-5 HV electronic speed control brings 3S LiPo capability and new profiles. A new Trail profile facilitates smooth driving for most of your adventures, while a new Crawl profile introduces hill hold and instant reverse for extremely technical courses. Long run times, up to 2 hours, are possible with a Traxxas 3S 5000mAh iD LiPo battery pack! (Battery not included)

### Improved Geometry

- Portal axles raise the axle link mounts, center driveshaft, steering drag link, and the tie rod up and out of harm’s way. Center ground clearance is increased while critical driveshaft and suspension link angles are reduced.

### Waterproof

- The TRX-4 Scale and Trail Crawler is fully waterproof. Only Traxxas’ patented innovation gives you the freedom to tackle creeks, snow, and mud without worrying about water in your electronics.
WHAT’S IN THE BOX:
- TQ-4, Ready-To-Drive® with Tactical Unit body
- TQ 2.4GHz 4-Channel radio system
- 4 Cell LiPo L6 14.8V 1800mAh (Part #2971)
- 3S 9.9V Waterproof ESC
- 4 Titan 21T 650 motor
- Quality tool set
- Quick Start Guide

WHAT YOU’LL NEED TO RUN YOUR MODEL:
- 6 or 7-cell NiMH battery pack, 4 AA Alkaline Batteries

SOLD SEPARATELY AT YOUR HOBBY DEALER

WHAT YOU’LL NEED TO RUN YOUR MODEL:
(Sold separately at your hobby dealer)
- 4 AA Alkaline Batteries
- 6 or 7-cell NiMH battery pack, or 2 or 3 LiPo battery packs with Traxxas High-Current connector
- Battery Charger

TRAXXAS SUPPORT
traxxas.com

This model is backed with Traxxas Total Support. You won’t find it anywhere else. Whether it’s a question about the motor, radio, replacement parts, or performance upgrades, 1-888-TRAXXAS is your toll-free link to fast friendly solutions. E-mail anytime to support@Traxxas.com.

SKILL LEVEL 1

The TQi transmitter is Traxxas Link Ready. Connect wirelessly to the Traxxas Link Application with the Traxxas Link wireless module — The TQi transmitter “0” panel with the “Traxxas Link” app is the most advanced, feature-rich, Ready-to-Race® radio system available. Now, TQi connects similarly to the latest Traxxas Link App for the ultimate ease of use and control. The TQi Radio System can be engaged with the Traxxas Link Wireless Module to unlock exciting features, such as instant Bluetooth® connectivity across the full range of powerful TQi features and telemetry tools through an intuitive high definition graphical interface, and the ability to have a friend remotely monitor real-time telemetry while you focus on the trail ahead.

The balance wires are integrated into the main connector for fail-safe, easy, and rugged connection to Traxxas LiPo chargers. Traxxas High-Current Connectors for virtually zero voltage loss. All Power Cell™ auto-detect iD-equipped Power Cell™ batteries and automatically set charge settings. Visit Traxxas.com to learn more about this feature and available Traxxas chargers and batteries.

SKILL LEVEL 1

No previous experience with radio controlled models is required. Model requires a minimum of setup, maintenance, or support equipment.

The only batteries engineered specifically for Traxxas vehicles
Traxxas Power Cell packs feature rugged construction with premium cells, hard-wired high-efficiency iD Label’d 12-gauge wires, and Traxxas High-Current Connectors for virtually zero voltage loss. All Power Cell™ auto-detect iD-equipped Power Cell™ batteries and automatically set charge settings. Visit Traxxas.com to learn more about this feature and available Traxxas chargers and batteries.

Auto Battery Identification

Authorized Traxxas dealers offer the Traxxas iD Battery™ quick connect/snap-and-charge connector that auto-detects iD-equipped Power Cell™ batteries and automatically sets charge charge settings. Visit Traxxas.com to learn more about this feature and available Traxxas chargers and batteries.
IMPORTANT! THIS PRODUCT IS NOT DESIGNED FOR CHILDREN OR MINORS YOUNGER THAN 14 YEARS OLD.

RESPONSIBLE ADULT SUPERVISION IS REQUIRED DURING OPERATION AND MAINTENANCE.

This is a high-performance model which is NOT intended for use on public roads or in congested areas where its operation may conflict with or disrupt pedestrian or vehicular traffic. Read all enclosed information before operating. Fully illustrated, step-by-step instructions describe adjustment, operation, and required maintenance procedures. This model should not be operated in a crowd, indoors or without adequate space. The vehicle is fully assembled, ready to run, and requires the following items for operation: 4AA alkaline batteries, 6-7 cell Nimh battery and charger. These are available from your hobby dealer. In an effort to continually upgrade our products, Traxxas reserves the right to make improvements and
